ASE Test & Evaluation Phase 1 & 2

Overview

- **Phase 1 Pilot Corpus Review**
- **Phase 1 Test & Evaluation**
- **Phase 2 Demonstration Corpus**
- **Proposed Phase 2 Testing**
- **Proposed Phase 2 Corpus Plans**
 - *Pilot Corpus*
 - *Study Corpus*
 - *Test Corpus*
 - *Proponent Corpus Collection*

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Phase 1 Pilot Corpus

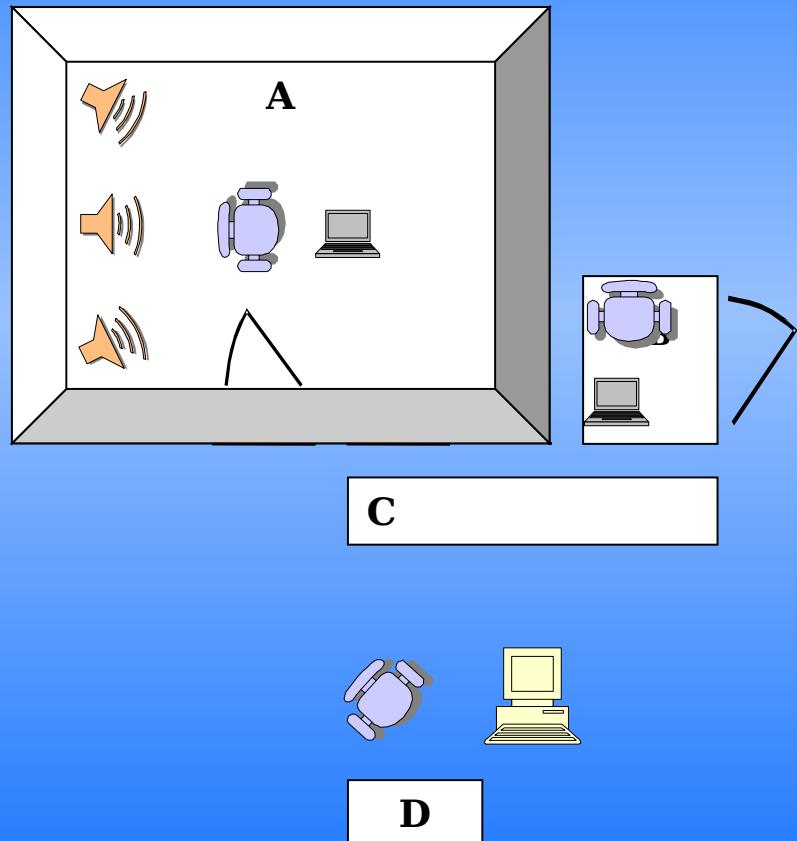

- ***Research and Test Components***
- ***10 Male + 10 Female Talkers***
- ***Vowel, Word, Sentence and Conversational Material***
- ***9 Acoustic Noise Environments***
- ***7/8 Sensor Channels***
 - ***2 GEMS channels***
 - ***1 EGG***
 - ***2 P-mic sensors (throat and fore head)***
 - ***1/2 Resident microphone***
 - ***1 Calibration microphone***
- ***70 Gbytes***

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Facility Description

A: Recording Chamber (12' x 10')

**Stereo Speaker +
Subwoofer
PC List Presentation
Sensors
Intercom
Patch Panel**

B: Chamber 2 Conversational (2' x 3')

**Speaker Array
Intercom
Patch Panel**

C: Sound Field Measurement

**D: Audio Engineering Station
PC Workstation, MOTU
and HDs**

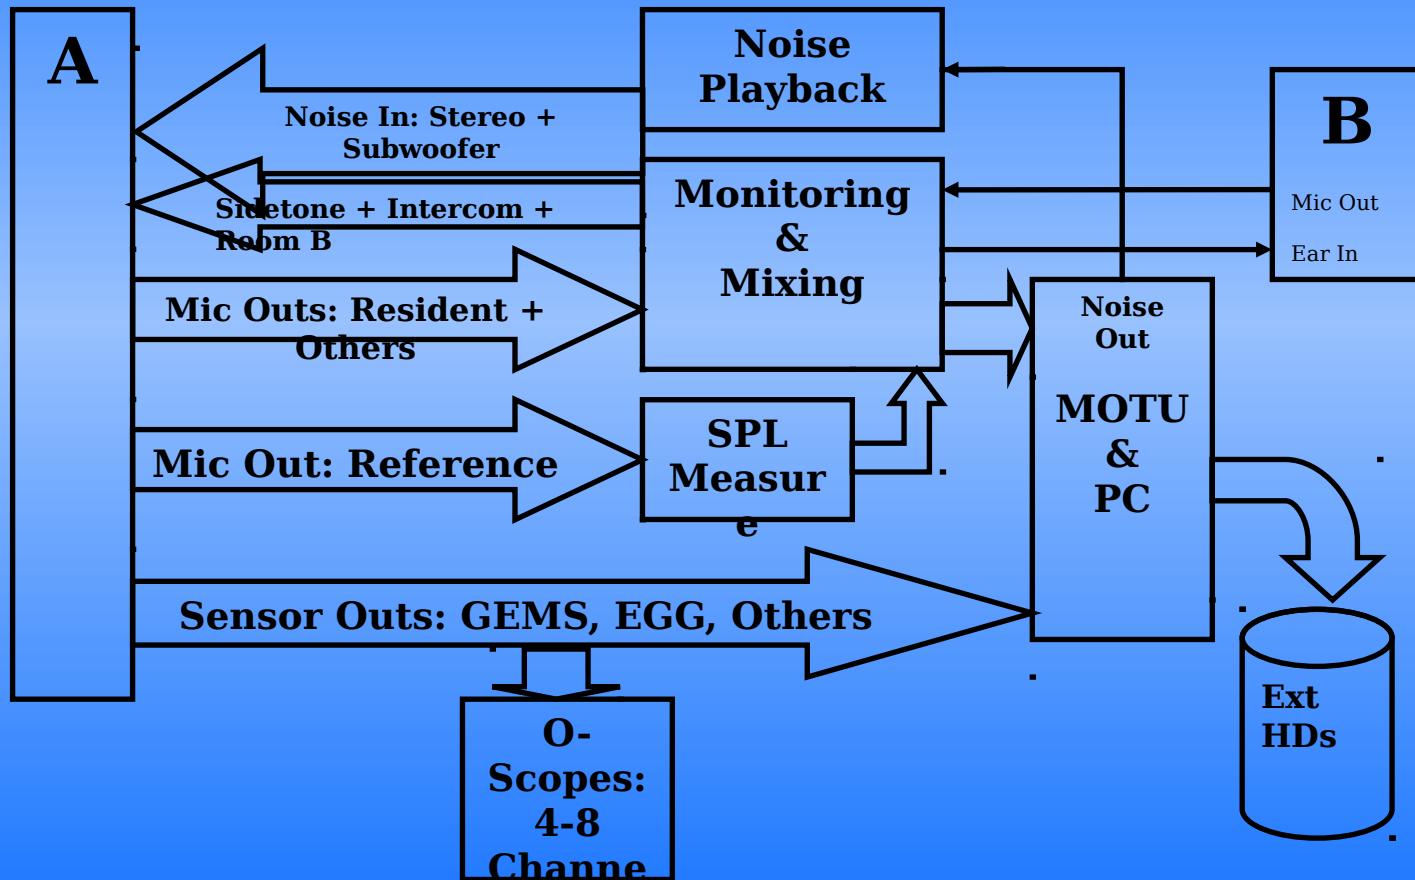

**Sound Field Reconstruction
Signal Generators and**

ARCON Corporation

J.D. Tardelli jdtardelli@arcon.com

Playback & Recording

ARCON Corporation
J.D. Tardelli - jdtardelli@arcon.com

Multitrack Synchronization

ARCON Corporation

J.D. Tardelli - idtardelli@arcon.com

Pilot Corpus Problems

- Sensor Signal Consistency
- Sensor Placement Limitations
- Sensor / Talker Interactions
- Talker Variability / Pathologies
- Limited Acoustic Field Frequency Range

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Phase 1 Test & Evaluation

- ***Characteristics - Methodologies***
 - Intelligibility - DRT 
 - Quality - Pair Comparison (A/B) 
- ***Baseline Evaluation***
 - *Intelligibility*
- ***Final Evaluation***
 - *Intelligibility*
 - *Quality*

ARCON Corporation

J.D. Tardelli jdtardelli@arcon.com

Phase 1 Baseline Test & Evaluation

- **Intelligibility - DRT**
 - **One DRT Lists for Each Talker in 9 Environments**
 - **Null and MELPe Processed**
 - **Select Talkers for Evaluation DRTs**
 - **Analysis of Baseline DRT Results**
 - Null Analysis
 - MELPe Analysis

ARCON Corporation

J.D. Lardelli

jdlardelli@arcon.com

ASE Phase 1 Final Test & Evaluation

- Intelligibility - DRT**

- Number Participants - 3
- Environments M2H, BHH, MOH
 - All participants not test in all environments
- Standard DRT Practices with no less than 10 Listeners, results reported for “culled” set of 8 Listeners.
- Talkers 3M/3F from Pilot or Supplemental Corpora
 - Talker selection limited for some participants
- 40dB Criteria - $I_{\text{Participant}} \text{ (high)} \geq I_{\text{MELPe}} \text{ (low)}$

Phase 1 Final Test & Evaluation

ARKON Corporation
J.D. Tardelli - jdtardelli@arkon.com

• Quality - Forced Choice Paired Comparison A/B Test

- Number Participant Systems - 3
 - with CELP, MELPe(2400), MELPe(1200) as controls
- Environments M2H, BHH, MOH + BHL
 - All participants not test in all environments
- Talkers 3M/3F from Pilot or Supplemental Corpora
 - Talker selection limited for some participants
- 48 Subjects as 6 Groups of 8 Subjects
- # Stimuli = 6 talkers * 4 env. * 6 coders * 2 orders * 2 presentations = 576
- 96 minutes testing/group, 6 16-minute blocks of 96 stimuli each
- Standard Test Procedures re randomization and block balance
- Criteria - $Q_{\text{Participant}}(\text{high}) \geq Q_{\text{CELP}}(\text{high})$

Phase 2 Demonstration

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Corpus

- Subset of Pilot Corpus
- 2 Male + 2 Female Talkers from “test” set
- DRT, Harvard PB Sentence & Vowel Lists
- Blackhawk, Bradley M2 and MOUT
 - High and Low Noise States
- All Sensor Channels
- Supplemental Material
- Provided Under Limited License to aid in BAA response

Phase 2 Demonstration Corpus

ARCON Pilot Corpus

J.D. Tardelli - jdtardelli@arcon.com

(cont.)

- Supplemental Materials
 - Acoustic noise files for the six environments presented (MBO)
 - All talker demographic and sensor information
 - Lists of all scripted material used in this data base
 - DRT word list decode information
 - Microphone and sensor information
 - ARCON Pilot Corpus Phase 1&2 design review presentations
 - ARCON Pilot Corpus Final Report
 - A short “Cheat Sheet” with environment and sensor codes
 - A list of sensor file problems and exceptions
 - DRT Baseline results
 - All Talkers
 - NULL and MELPe 2400 processed
 - Analysis of Baseline DRT results

ARCON Corporation

I.D. Tardelli - idtardelli@arcon.com

Proposed Phase 2 Testing

- Program Milestone and Waypoint Testing
 - Supported by Test Corpus
 - System Characteristics to be Tested
 - Intelligibility by DRT
 - Quality by Paired Comparison (A/B)
 - Aural Speaker Recognition, “Recognizability” by Schmidt-Nielsen Method
- Proponent Testing
 - Encouraged

ARCON Corporation

J.D. Tardelli j.tardelli@arcon.com

Aural Speaker Recognition

- Recognition of the Source Talker by the Receive Listener
- Measured at the output of the synthesizer
- What Speech?
 - Coded Speech vs. Coded Speech
 - Coded Speech vs. Direct Speech
- Subjective SAME - DIFFERENT Method
- Using Scripted Materials

Proposed Phase 2 Corpus

ARCON Corporation
J.D. Tardelli - jdtardelli@arcon.com

Plans

- ***Demonstration Corpus***
 - limited license for use associated with BAA response
- ***Phase 1 Pilot Corpus***
 - to be released to Phase 2 Participants
- ***Study Corpus***
 - Talker Variability; June/July Collection
- ***Test Corpus***
- ***Proponent Corpus Collection***

ARCON Corporation

J.D. Tardelli jdtardelli@arcon.com

Study Corpus

- Talker Variability
 - regional dialects
 - recognizability characteristics
- Sensor Electronics
- Optimized Sensor Placement
- Expanded Frequency Range of Acoustic Noise Simulations
- Aid in Design of ASE P2 Test Corpus

ARCON Corporation

Proposed Phase 2 Test Corpus

John DeLellis jdelellis@arcon.com

- **Design Criteria**

- This is a Test Corpus not a Research Corpus.
- The Test Corpus needs to support all of the test methodologies of ASE P2.
- ASE P2 Participant's proprietary sensors need to be considered from the start.
- With either Waypoint or Milestone testing every 6 months, the Test Corpus will need to be supplemented as the test program proceeds through its stages..
- Talker effects need to be controlled.
- At certain stages of the program the Test Corpus will need to be segmented into releasable Training and private Test data sets.
- Parts of the Test Corpus must be available in a timely manor in order to meet both participant requirements and the test schedule.
- The collection of the Test Corpus must be cost and time effective.

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Proponent Corpus Collection

- **Encouraged**
- **Speech + Noise**
- **Human Subject Issues**
- **Sensor Factors**
- **Synchronous Recording**

ARCON Corporation

J.D. Tardelli idtardelli@arcon.com

Speech + Acoustic Noise

- Mixing Methods
 - Electronic
 - Head & Torso Simulator in Noise Simulation
 - Subject Recording in Noise Simulation
 - In Situ Recording
- Acoustic Noise Field Sources
 - Demonstration Corpus
 - ARCON

ARCON Corporation

J.D. Tardelli - idtardelli@arcon.com

Human Subject Issues

- Risk Factors
 - Active Sensors, Acoustic Noise Exposure
- Minimization of Risk Factors
 - Subject Instrumentation
 - # Sensors, Placement, Noise Attenuation
 - Subject Recording Protocols
 - Hearing Thresholds
 - Cumulative Noise and Active Sensor Exposure
 - Schedule
- Subject Data Base
 - Demographics +
 - Privacy

ARCON Corporation

I.D. Tardelli ijtardelli@arcon.com

Human Subject Issues (cont.)

- **Informed Consent Document**
 - Procedures to safeguard personal information
 - Details on minimization of risk
 - Inputs from Sensor Manufacturers
 - OSHA Noise Exposure Limits
- **Independent Review Board**
 - Initial review of all documentation,
 - Possible modifications,
 - Annual review and
 - Intermediate reviews of any changes to protocols or practices.

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Record Session Noise Exposure

- Sample Scripted Material Schedule
 - Level Adjustment Materials (.5 min)
 - Sustained Vowels within Words (1 min)
 - Diagnostic Rhyme Test Word Lists (8 min)
 - Harvard Sentence Lists (3 min)
 - CVC Nonsense Words in Carrier Phrase (3 min)
- Noise Exposure Schedule

ARCON Corporation

Subject Noise Exposure Schedule

| Condition | Time (min) | SPL dBA | OSHA Max (hrs) | Unattenuated Daily Dose | Attenuation dBA | Effective Noise Level dBA | OSHA Max (hrs) | Attenuated Daily Dose |
|-----------------------------------|------------|---------|----------------|-------------------------|-----------------|---------------------------|----------------|-----------------------|
| Office Environment Exposure | 20 | 45.0 | 4096.0 | 0.01% | 0.0 | 45.0 | 4096.0 | 0.01% |
| Break | 30 | | | | | | | |
| MCE Environment Exposure | 20 | 66.0 | 222.9 | 0.15% | 34.4 | 31.6 | 26249.5 | 0.00% |
| Break | 35 | | | | | | | |
| M2 Environment (High) Exposure | 20 | 104.0 | 1.1 | 29.02% | 25.9 | 78.1 | 41.6 | 0.80% |
| Break | 30 | | | | | | | |
| M2 Environment (Low) Exposure | 20 | 64.0 | 294.1 | 0.11% | 25.9 | 38.1 | 10660.6 | 0.00% |
| Long Break | 65 | | | | | | | |
| MOUT Environment (High) Exposure | 20 | 98.0 | 2.6 | 12.63% | 7.0 | 91.0 | 7.0 | 4.79% |
| Break | 30 | | | | | | | |
| MOUT Environment (Low) Exposure | 20 | 58.0 | 675.6 | 0.05% | 7.0 | 51.0 | 1782.9 | 0.02% |
| Break | 35 | | | | | | | |
| UH-60 Environment (High) Exposure | 20 | 98.0 | 2.6 | 12.63% | 20.0 | 78.0 | 42.2 | 0.79% |
| Break | 30 | | | | | | | |
| UH-60 Environment (Low) Exposure | 20 | 65.0 | 256.0 | 0.13% | 20.0 | 45 | 4096.0 | 0.01% |
| Daily Cumulative Noise Exposure | | | | 54.73% | | | | 6.42% |

ARCON Corporation

J.D. Tardelli jtardelli@arcon.com

Sensor Factors

- Calibration Microphones
- Resident Microphones
- GEMS Interference
- P-Mic Pre-amp

Synchronous Recording

- Use of multiple MOTUs

ARCON Corporation

J.D. Tardelli - idtardelli@arcon.com

Supporting Material

ARCON Corporation

J.D. Jata DeMille - jataudemille@arcon.com

Scripted Material - Sustained Vowels

sound word
 ^ hut

a: harm
 @ hat

e heck
 e: hurt

i hit
 i: heat

 o hot

o: hore
u hood

 ai hive
 au how

Ou home
 e.. hair

 ei hay
i.. here

 oi hoy

ARCON Corporation

I.D. Tardelli idtardelli@arcon.com

Scripted Material - Diagnostic Rhyme Test (DRT)

Word Lists

MOOT or **BOOT**

Voicing

SHEET or **CHEAT**

Nasality

JAB or **GAB**

Sustention

POT or **TOT**

Sibilation

GHOST or **BOAST**

Graveness

DINT or **TINT**

Compactness

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Scripted Material - Harvard Sentences

1965 Harvard Phonetically Balanced Sentences

72 lists of 10 sentences balanced across lists

List 1:

1. THE BIRCH CANOE SLID ON THE SMOOTH PLANKS.
2. GLUE THE SHEET TO THE DARK BLUE BACKGROUND.
3. IT'S EASY TO TELL THE DEPTH OF A WELL.
4. THESE DAYS A CHICKEN LEG IS A RARE DISH.
5. RICE IS OFTEN SERVED IN ROUND BOWLS.
6. THE JUICE OF LEMONS MAKES FINE PUNCH.
7. THE BOX WAS THROWN BESIDE THE PARKED TRUCK.
8. THE HOGS WERE FED CHOPPED CORN AND GARBAGE.
9. FOUR HOURS OF STEADY WORK FACED US.
10. A LARGE SIZE IN STOCKINGS IS HARD TO SELL.

ARCON Corporation

J.D. Tardelli - jdtardelli@arcon.com

Conversational Scenarios

- Designed to:
 - be asymmetric with the talker providing the majority of the verbal interaction
 - last a minimum of five minutes
 - minimally non-combative and non-controversial
 - of general interest regardless of experience, sex, or age
 - designed to reduce fatigue and increase interest
 - be quickly read and learned and not require special skills to implement

ARCON Corporation

I.D. Tardelli - idtardelli@arcon.com

Acoustic Noise Environments

- **Blackhawk Helicopter (98dBA, 112dBC SPL)**
- **M2 Bradley APC (109-112dBA SPL)**
- **Military Operations in Urban Terrain - MOUT (40dBA floor, 98dBA gunfire)**

Quality Pair Comparison (A/B) Task

ARCON Corporation
J.D. Tardelli - jdtardelli@comcast.com

- In this test we are evaluating systems that might be used for military voice communications under a variety of conditions. You are going to hear a number of samples of speech played to you through your headset. Each sample will consist of a sentence that was produced with two different communication systems. The first is identified as A and the second is identified as B.
- Please listen to both A and B and then decide which of the two you prefer. Preference is strictly your decision. Some samples will include background noise. Consider the whole signal, background and speech. Your decision should be based on your comparison of the quality of the whole signals.
- Some of the A/B pairs will seem clearly different and your decisions will be effortless. Others may be more difficult. **ALWAYS MAKE A DECISION BETWEEN THE TWO.** "I DON'T KNOW" and "I don't like either one" ARE NOT OPTIONS. Make your decisions independently. You should always compare the two current sentences, and not use any other presentation.
- This is not a test of you in any way; it is an evaluation of the systems. There is no right or wrong. Do not discuss how you are making your ratings during breaks or stretching periods.
- To indicate your choice, use the button box at your test station. After listening to the two sentences, all lights on the box will flash. At that time, please press the appropriate single button that represents your opinion of the communication quality of the sample just heard. Use the leftmost button if you preferred the first sample (or A). Use the button on the far right if you preferred the second speech sample (or B). The corresponding light will be activated when a choice has been indicated. Once the button has been pushed, you will not be allowed to change your mind, so please respond carefully.
- If you attempt to indicate your opinion before the completion of the sentence sequence, when all the lights flash, your choice will not register and no light will be activated. The test will not proceed until an opinion has been indicated for all participants, therefore, be sure that you have a light lit indicating your opinion.
- After you have given your opinion there will be a short pause before the next sample begins.
- Thank you for participating in this research. Feel free to ask any procedural questions at this time.
- For practice, you will hear several samples and give an opinion on each. Then there will be a break to make sure that everything is clear before we start the test. Do not hesitate to ask questions if you have any.
